

Keion Brooks Jr. vs Seattle U - 12-17-23 FILM

Keion Brooks showcased his ability to hit catch and shoot 3's and score off the dribble. He will make several 3's throughout this game and hit some tough midrange jumpers. He will show his ability to get to his spot with a play in which he will seal off his defender and caught a entry pass near the left short corner and backs his defender down close enough until he rises up for a jumper. He will really start to pick up his offensive production in the second half as his team attempts to fight back into this game. He played a big part in the comeback and had a huge bucket late in the game as he gets the ball on the right wing with 25 seconds left, drives middle and banks a floater in off the glass to tie the game.

Defensively, Keion Brooks displayed the ability to be active on the glass and play help side defense near the paint. He will finish the game with 9 rebound and would be active in that area early in this game. He didn't have any blocks in this game, but he would give contest around the rim to help detour some shots.

While Keion displayed his ability to be impactful throughout this game. I noticed he will play 44 minutes in this game. Starting the game off slow offensively forcing some looks but successfully pass out of some for assist. As the game went on, he would start to become more and more valuable for his team on both sides of the ball. Coming up big in the 2nd half and in both overtime periods.
